

## Step 1: Setup your LG webOS 3.0 Monitor

To begin with the setup, use the remote to turn on the LG monitor wait for it to fully power on.

1. After a few seconds you should see the **Language & Country selection** menu. Go through this menu and press **OK**. If your monitor does not boot in this menu, you should perform a factory reset.

### How to perform a factory reset.

- a. Press and hold the **settings** button until a small box with a chat icon appears. Quickly press **0 0 0 0 OK** to open the Signage Settings menu. *This can take a few tries.*
- b. Press the **→** button to enter the submenu of the Signage Setup menu.
- c. Scroll all the way down until you see the **Factory Reset** option. Click **OK** and **Confirm**.
- d. The monitor will turn off. Turn the monitor back on and you should start in the Language & Country selection menu. Continue with step 1.

2. After the Language & Country selection, you arrive in the **Rotation menu**. If the monitor will be used in portrait mode you can change the OSD to Portrait Mode. **Do NOT change the Content Rotation.**
3. Set your **Internet Connection**. It is preferable to use a wired network connection. Press **Connect**.
4. **On/Off timer**. Do **NOT** use the on/off timer! You can manage the on/off schedule from our CMS.

Congratulations! Your LG webOS monitor is now ready for the ZetaDisplay software.

## Step 2: Installation ZetaDisplay software on LG webOS 3.0 monitor

Before installation of the ZetaDisplay software you must have completed Step 1.

1. Press and hold the **settings** button until a small box with a chat icon appears. Quickly press **8 0 8 0 OK** to open the Server Settings menu. *This can take a few tries.*
2. In the Server Settings menu, please set the following options:
  - a. Set the **Application Launch Mode** to **Local**
  - b. Set the **Fully Qualified Domain Name** to **On**.
  - c. Set the **URL** to be: **https://get.zetadisplay.com/lgapp/lgapp.zip**
3. Next to the Local Application Upgrade option, please select the **Remote** option, and then confirm to begin the application install process on to your LG monitor.
4. After a short time a message will appear on the monitor confirming that the ZetaDisplay software for LG webOS client installation has been successfully installed.
5. Please turn the monitor off and then (after 10 seconds) back on and ZetaDisplay will start automatically after around 10 to 20 seconds.
6. The LG monitor will check if the correct firmware is installed. If not, it will ask to download and update the firmware. The firmware size is 450-600mb. The download time depends on your internet connection. Press **OK** to continue.
7. Congratulations! You have now successfully configured your LG monitor with ZetaDisplay. You only need to connect your monitor with ZetaDisplay CMS. To do this, please go to third and last step.

## Step 3: Connect your LG webOS monitor with the ZetaDisplay license

Before you can connect to ZetaDisplay CMS, you will need to carry out two previous steps: the first one is setup your LG webOS monitor and the second one is to install the ZetaDisplay software on your monitor. Finally you connect your monitor to ZetaDisplay CMS.

### Open [cms.zetadisplay.com](https://cms.zetadisplay.com) (option 1)

1. Prior to this installation you purchased a license.
2. Open a browser on your phone or desktop computer and head to [cms.zetadisplay.com](https://cms.zetadisplay.com). Login using your credentials.
3. Go to the top right corner and click **register player**. Enter the registration code, this is the 8 digit number on the LG monitor. Give your monitor a name.
4. Press **register**. Your monitor will automatically connect with the ZetaDisplay cms.
5. You can start creating and scheduling professional-quality campaigns. Need help? Pay a visit to our [Support Portal](#) for information on how to create Campaigns and Playlists.

### Received a code from ZetaDisplay (option 2)

1. Please make sure you see an 8 digit number on the LG monitor. Press **8, 8, 8, 8** on the remote.
2. Now you can enter the code you have received from ZetaDisplay. After entering, press **“OK”**. The system will confirm that the LG monitor is registered to the ZetaDisplay CMS.
3. Open a browser on your phone or desktop computer and head to [cms.zetadisplay.com](https://cms.zetadisplay.com). Login using your credentials.
4. You can start creating and scheduling professional-quality campaigns. Need help? Pay a visit to our [Support Portal](#) for information on how to create Campaigns and Playlists.
