

Release notes - Engage - 1.9.0

New Features

[EN-71](#) Delete folders that contain files

[EN-140](#) Power schedule

[EN-196](#) Color coded icons for individual content scheduling in library and Playlist views.

[EN-798](#) Possibility to configurate if Template is Live or Transcoded

[EN-808](#) Support Intranet web pages

Bug fixes

[EN-293](#) Reset password directs the user to cms.zetadisplay.com not engage.zetadisplay.com after password has been reset.

[EN-367](#) Not all sub groups are shown in shared groups from sub workspace

[EN-389](#) As a user I want to see what the player is playing at 10:22 but there is no playlist to show

[EN-403](#) There is a mismatch between scheduled time and "content player is playing"

[EN-424](#) Thumbnails don't generate

[EN-464](#) Design is broken when we are adding too many labels into a group

[EN-466](#) On sub workspace, grey out the schedule option from Media for a shared content

[EN-484](#) The schedule option is available for folder and also not getting any response while doing this

[EN-501](#) Bulk deleting doesn't work from library if item is on playlist

[EN-724](#) Delete items from shared folders that are published in playlists

[EN-754](#) Labels - Getting an error while creating an attribute and its value along with a player

[EN-755](#) Library - After creating a folder showing "Invalid date Invalid date" instead of modified date and time

[EN-800](#) Library - Not giving any response back while doing a bulk action delete

[EN-801](#) Library - System allowing a user to delete the same file multiple time
